

**Capacity 8 t/h**  
depending on the product size

**Sorting machine for peeled products**

for peeled potatoes

for peeled carrots  
and baby carrots

for peeled onions

for peeled  
beetroot

**robust and low maintenance**

adjustable automatic cleaning system  
and modern *Hygienic-Design*

**High Power LED**

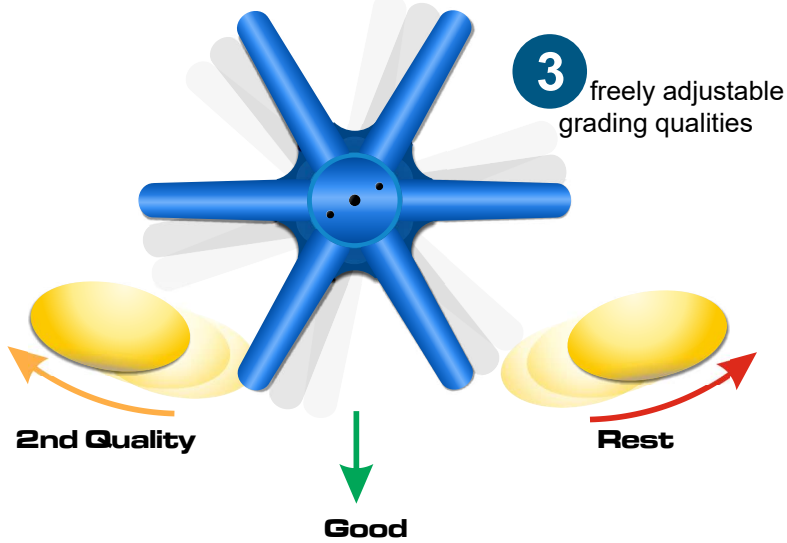

use of power saving, durable LEDs  
in optical sensing head

**Remote Service**

software updates and Remote Service  
via internet with *military-grade* encryption

## Ejector

- electrically driven rubber-finger wheel (international patented)

- freely selectable assignment of the grading compartments anytime

## Grading Characteristics

- scanning of the total product surface
- colour values and contrast differences on the product surface
- remaining peel
- rotten spots, green discolouring
- red, brown, black spots
- size, outer shape

## Full Control in Full HD

- modern 21" touch panel with Full HD display as the central interface for the operator
- easy and fast entrance in electronic sorting with professional software
- live image function for a realistic image of the scanned object as well as a coloured marking of defects
- extensive control and statistic functions

## Everything already tuned up

- delivery the grading machine in fully assembled state
- therefore a fast and easy implementation into pre-existing production lines is possible

## Connection

- Electric
  - 400V / 50Hz / 2,6kVA
  - 3P + N + PE
- Water and Compressed Air
  - for automatic cleaning function
  - 3/4" conduit diameter
